金木水火土

MODULE 1: INTRODUCTION

This seminar requires a basic knowledge of the Five Elements and their interrelationships. The focus of Module 1 is on learning the foundations of the Ba Zi system as a pre-requisite to Module 2 which focuses on Ba Zi diagnosis and the construction of an acupuncture treatment derived from a person's birth data. This powerful system offers a very unique approach to acupuncture treatment as well as advising patients about where they are in life and giving concrete remedies for improvement. Module 1 teaches how to outline and forecast the course of events in a person's life (health, relationships, career, money). Participants are encouraged to use their birth data (year, month, day, hour and location) and the birth data of family, close friends and patients for case study practice. Please email evidencebased2020@gmail.com if you have any questions about the seminar.

AFTER THIS SEMINAR, YOU'LL BE ABLE TO:

- Explain the basics of Stem-Branch Theory and the various cycles
- Determine a patient's constitutional element and what each element means from their birth data
- Interpret their Five-Element balance for strengths and weaknesses
- Identify the major themes and events (good and challenging) in a patient's life
- Provide concrete remedial measures to improve the patient's life

SEMINAR IS LIVE ONLINE
CALL 407 308 2886 FOR INQUIRIES.

MODULE 2: DIAGNOSIS & TREATMENT

This is the follow-up seminar to Module 1. The module 2 seminar focuses on diagnosis of medical problems as well as life problems (money, career, relationships) and the construction of an acupuncture treatment protocol based on analysis of the birth data learned in Module 1. You must take Module 1 before you can take Module 2.

AFTER THIS SEMINAR, YOU'LL BE ABLE TO:

- Analyze birth data chart for excess and deficiency of the elements
- Formulate a diagnostic impression from the birth analysis
- Create an acupuncture treatment protocol to balance the elements in the chart and the patient
- Advise the patient on appropriate remedial measures and the timing and necessity of future treatment
